The Bruce Duncan Memorial Lecture Series

The Giant's Rib Discovery Centre proudly announces the inaugural Bruce Duncan Memorial Lecture Series, named in honour of the former General Manager of the Hamilton Conservation Authority, who died tragically last fall.

This series is dedicated to promoting the Niagara Escarpment as an internationally-recognized World Biosphere Reserve, as well as being a truly unique topographic feature of our natural and cultural heritage.

This Month: May 6, 2007

Viewing the Niagara Escarpment through the Eyes of a Nature Photographer

John MacRae became interested in photography as a child growing up in Dundas. Over the years, he has worked to refine his photographic skills and, since retiring as a chiropractor, he has been able to pursue his hobby even further. John has collaborated in the publication of a pictorial book on Dundas and provided photography for a book on a local church.

In 1996, he was honoured for his extensive volunteer work in the community when he was named Dundas Citizen of the Year. His photography has taken him to many countries and every province in Canada including the NWT.

John, his wife Joyce, and their sons spend summers at their cottage on the Bruce Peninsula where they enjoy exploring the northern reaches of the Niagara Escarpment with their grandchildren.

Come relive John's experiences through his photographer's lens as he talks about "Viewing the Niagara Escarpment through the Eyes of a Nature Photographer".

Next Presentation: September 9, 2007

Art and Photography of the Heritage of the Niagara Escarpment

Celebrating 'the art' of the natural and cultural heritage of the Niagara Escarpment at the Dundas Valley Escarpment Centre featuring a new local artist every month Saturdays and Sundays from 9:00 a.m. - 3:30 p.m.

This Month's Artist:

The Photography of Janusz Wrobel

"Janusz (Jack) Wrobel is a dedicated paddler and wilderness expert. His fascination for the evolution of life in the difficult environment of the Great Canadian Shield has lead him to create an extensive collection of images that capture both the beauty and the processes of nature in this environment.

This revived his interest in other aspects of photography, leading to an exploration of the processes of aging and weathering in urban and rural settings: intense, textural and colour-drenched surfaces exposing records of human ingenuity ravaged by time.

Changes in Janusz Wrobel's personal life in 2003 renewed his focus to artistic facets of photography, and accelerated his interest in public showings of his work."
